

## Partall® Water Soluble PVA

Partall® Coverall Film is the new non-hazardous, low VOC water-based polyvinyl alcohol (PVA - Parting Film) coating that creates a reliable, solvent resistant, yet water soluble, release barrier between parts and reactive mold surfaces. The higher viscosity of Partall® Coverall Film allows application by brush, roller, sponge or cloth and it has excellent spray characteristics. Its improved formulation enhances use - no fisheyes or cob webbing, self-leveling and faster dry film build up, while leaving a smooth, shiny finish on the mold surface.

### Physical Properties

Appearance	Clear Purple Liquid
Odor	Neutral
Drying Time	15-60 minutes
Coverage	One gallon covers approximately 400 ft <sup>2</sup>

### Technical Properties

Boiling Point	> 200°F
Specific Gravity (H <sub>2</sub> O=1)	1.02
